

Preface

[GDR MésoImage](#) and the German research group [DFG Forschergruppe 760 "Scattering Systems with Complex Dynamics"](#) have decided to organize together a Summer school on wave propagation and scattering in random, chaotic and other complex systems. This School took place at the [Institute of Scientific Studies in Cargèse](#) (IESC) at Corsica island, France, from **Monday, July 12 to Friday, July 16, 2010**. The participants arrived on Sunday, July 11 in the afternoon and stayed until Saturday, July 17. Transportation by bus was organized between the Ajaccio airport and Cargèse on these dates.

The School provided insightful lecture courses on modern developments in the fields of wave physics of disordered systems and quantum chaos, as well as on other wave phenomena in complex environments. The lectures were given by internationally recognized experts. They were supplemented by a number of shorter talks given by younger participants and focusing on more specific aspects of particular subjects discussed in the lectures. Finally, a poster session was organized to allow all the participants to present and discuss their research.

We would like to thank our main sponsors – the German Research group ["Scattering Systems with Complex Dynamics"](#), funded by the DPG, the French research group [MésoImage](#), funded by CNRS, and the [Institut de Physique](#) of CNRS. We would like to thank the staff of the IESC – Brigitte, Pierre-Eric, Nathalie, and Dominique and the entire kitchen staff – as well as Michelle Peretto (Grenoble), for their continuous and precious assistance in all stages of this project.

We will return.

Scientific Directors:

[Bart van Tiggelen](#) (Grenoble)
[Hans-Jürgen Stöckmann](#) (Marburg)

Organizing Committee:

[Sergey Skipetrov](#) (Grenoble)
[Ulrich Kuhl](#) (Marburg)
